

10. Acknowledgements

We would like to acknowledge the extensive participation and assistance that was provided in this study by representatives of the stakeholders in the future of Lake Perris and the Perris Dam. Especially helpful were the primary DWR contacts, Rich Sanchez, Chief – State Water Project Operations Support, and Teresa Sutliff, Chief – Civil Maintenance Branch, both of whom provided extensive assistance and guidance. Five meetings were held with excellent attendance. The teams that were established to evaluate the issues were the source of the knowledge and expertise that resulted in the discussion summary and rating matrices that are the heart of the study.
